Art Unit: 1797

Claims 29-52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 29 “high (e.g.)” and “low (e.g.)”, in claim 30 “highly”, in claim 42 “optionally”, and in claim 43 “optionally as low” are vague and indefinite because it is unclear how these terms further limit the claims. In claim 44 it is unclear how the “scale deposition controlling amount” further limits the “scale inhibiting amount” of claim 30. In claim 46 it is unclear how the formula which may include compounds further limits the “copolymer” or “terpolymer” of claim 30. In claims 51 and 52 “the monomer” lacks clear antecedent basis. Claims 31-41, 45, and 47-50 depend from the above claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 29-52 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis et al. 6,071,434. It is submitted that Davis et al. disclose (see col. 1 line 43 through col. 4 line 65, and Examples 8 and 11) processes for inhibiting the formation of scale in water systems by addition of the compositions at the temperatures and alkaline conditions, as recited in the instant claims, respectively.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
